

BIT Consultants

Bailey Information Technology Consultants, LLC (BIT Consultants, LLC) is a cutting-edge technology integrator that provides full-lifecycle engineering, subject matter expertise, and professional services solutions. Our areas of focus include enterprise engineering, geospatial support services, advanced research, industrial security, adjudication enterprise records management, and service-support solutions.

We have partnerships in place with both large and small firms in support of the Intelligence Community, Department of Defense, non-federal government (i.e. state and local), and commercial sectors to help solve their most complex problems. BIT Consultants is comprised of a diverse pool of engineers, scientists, subject matter experts, and management professionals who are highly degreed and experienced.

We take pride in hiring Veterans who are former officers and enlisted U.S. military personnel. As a result, we execute with integrity and ethics across all of our engagements. Our organization takes pride in delivering high-quality products and solutions in support of our unique customer base. Our current and past projects have allowed us to develop a wide-ranging and unique product offering. We proudly support mission-critical requirements that increase process efficiency and reduce costs in order to deliver products on time.
